

# publication strategy

Number of participants: 12

## What kind of article is this?

✓  3

1 <https://doi.org/10.1080/19322909.2015.1076710>

B

pay-walled paper, without any alternative (no open access (OA) copy available)

✓  2

2 <https://doi.org/10.1080/0140528790010209>

D

paywalled paper : a copy is available somewhere, though it is not really an open access one

✓  4

3 <http://dx.doi.org/10.2139/ssrn.4030762>

A

preprint

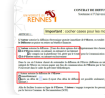

✓  5

4 <https://doi.org/10.1038/s41467-018-07761-2>

C

paper published in OA

this is a publication contract between a PhD student and her university: which claims are true about this contract and why?

dissertation's full-text will be made available only to university members (authentication required)

0%

0 votes

✓ The author can modify this kind of contract whenever she wants

0%

0 votes

✓ Since the dissertation will be available in open access, there is less risk of it being plagiarized

0%

0 votes

Since a thesis is an academic work, it is not compulsory for the author to anonymise the personal data she may have collected in her study such as personal identity, age and sex...

0%

0 votes

3

predatory open access or not?

review process not clear

---

low quality (because of publish or perish)

4

are these journals reliable for a publication project? (put the most reliable at the top)

- ✓ Polish journal of science (ISSN 1643-9953)
- ✓ Journal of Imaging (ISSN: 2313-433X)
- ✓ Clinical Infectious Diseases : open access (ISSN : 2684-4559 )
